

METRONOMIA stands for quality, competence, continuity, and unconditional customer orientation in terms of statistical services and data management in clinical research. As a growth-oriented medium-sized company with around 130 employees, we operate internationally. Our customers appreciate the competence and commitment of our employees and we value our employees as the basis of the company's success. Join a motivated and friendly team as a

Full Stack Developer

Your responsibilities

- Design, develop, and maintain both customer-facing and internal applications to support and enhance clinical research activities.
- Collaborate with clinical data managers, biostatisticians, statistical programmers, and other stakeholders to define requirements and translate business needs into technical specifications.
- Build responsive front-end interfaces using modern JavaScript frameworks and HTML/CSS.
- Develop and maintain robust back-end services and APIs using languages such as Python, Java, or .NET.
- Manage and optimize PostgreSQL databases for performance and scalability.
- Implement data analytics and reporting tools to support data-driven decision-making.
- Ensure application performance, uptime, and scale, maintaining high standards of code quality and thoughtful application design.
- Provide technical support and troubleshooting for internal software issues.
- Stay current with new technology trends and evaluate modern software technologies to enhance the development process.

Your profile

- Bachelor's or Master's degree in Computer Science, Information Technology, or a related field.
- Minimum of 5 years of experience in full stack development, including both front-end and back-end technologies.
- Proficient in front-end technologies, including JavaScript, CSS, HTML, and frameworks like React or Angular.
- Strong experience in server-side languages such as Python, Java, or .NET.
- Experience with SQL database design and management.
- Knowledge of data science methodologies and tools (e.g., Python libraries for data analysis) is a plus.
- Excellent problem-solving skills and the ability to work independently or as part of a team.
- Strong communication skills and fluency in English.

Our offer for you

- **Appreciation and family-friendliness!** We see and respect you as a person and support your professional compatibility with hybrid working models.
- **Excellence is worth it!** We offer attractive remuneration and extensive company social benefits!
- **Flat hierarchy!** Our entire team meets at eye level at all times! In this way, we create a special working atmosphere for our highly motivated and qualified team!
- **Challenging tasks!** There is a detailed introduction to the area of responsibility and regular opportunities for internal and external training!

Have we piqued your interest? We look forward to getting to know you!
